## End of Semester

At the end of a semester, you have several options for managing your course.

Since this semester, some things are new  **New from WiSe 2025/26:**

\* **Option 1:** Keep the course and allow students to continue accessing it.

- Nothing needs to be done.

\* **Option 2:** Keep the course, but restrict student access.

- Reset the course (see [Course reset](#)) and set it to *Hidden* in course settings.

\* **Option 3:** Use the course for the new semester without previous participants.

- A new empty course will automatically exist in your course category for the upcoming semester. Import the old course as described in [Course import](#).
- If you indicated during course planning that no new course is needed, but you want to duplicate the old course, do so independently (no email to Moodle support needed) (see [Course duplicate/copy](#)).

\* **Option 4:** Delete the course.

- Delete your course via the course management area (see [New: Delete course](#)).

\* **Option 5:** Create a new empty course.

- Create the course independently (see [New: Create course](#)).

\* **Option 6:** Back up/archive the course.

- Create a course backup (.mbz file) (see [Backup course \(.mbz file\)](#)).

## Course reset

To reuse the same course next semester with all activities and resources, but delete enrolled participants, their data, posts, grades, etc., use *Reset*.

**Reset course**

4. If your course uses *activities* or *groups*, you can remove *grades*, *groups*, and *groupings*.

- Activities are listed, so you can selectively delete grades, submissions, and forum posts without removing the activity itself.

5. Click **Reset course** to save changes.

**Note: All selected data will be permanently deleted from the course.**

6. Review in the overview page: the number next to *Roles > Unenrol* shows how many users will be unenrolled.
7. At this moment, the process has been completed.
8. Verify under *Participants > Enrolled users* that only you remain as *Course leader*.
9. Update course name and short name for the new semester.

**New from WiSe 25/26:** Update the course category by entering your surname under *Course category* and selecting the correct category for the new semester.

## Course import

Moodle allows you to reuse courses in the coming semester without having to completely recreate all course content.

The following steps must be observed:

- empty Moodle course: new empty course for the new semester
- course import: import the old course into the new course

## Creating a course via PRIMUSS

**New as of WiSe 2025/26:** You no longer need to apply for a new course for your teaching events. Course application is no longer required. Courses are automatically transferred from the PRIMUSS course module according to planning and created automatically (exception in WiSe 25/26: Faculty of Social Work).

Courses that were not created in PRIMUSS can **now be created by yourself** (see [Create course](#)) or, if the course is required for a different course category, via the course request form.

Go to the desired course. Steps for importing are described below.

## Course import / reuse courses

# Test course 2026

Course Settings Participants Grades Reports More ▾

## Course reuse

Import

Backup

Restore

Reset

To reuse and “copy” one of your already existing courses (on the current Moodle learning platform), you can use the Import function.

In the central menu bar, click on *More* → *Course reuse*. Select Import from the menu.

Choose the course you want to import data from and click continue.

## Import settings

On the following pages you can decide which activities and materials you want to restore. Elements that you do not need (e.g. the *Badges*) can be removed by deactivating the checkboxes.

Next in the *Schema*, you will see an overview of the elements to be imported. Use the Perform import button in the *Confirmation and review* step to start the import process. You can make changes using the Previous button.

After the import has been successfully completed, you will receive a green information notice. By clicking Continue you will be taken to the imported/copied course and can update it for the new semester.

Note: Please note that when importing, no participants or their user data are transferred and all forum posts as well as student contributions in activities etc. are deleted. The course is therefore automatically reset. Only the enrollment key is retained and may need to be changed by you.

### General

Announcements 

Always disable the import of Announcements.

During the course import, you also remain in the current course. If you do not disable its transfer, you will have two *Announcements* activities after importing the course.

# Duplicate/copy course

New as of WiSe 2025/26

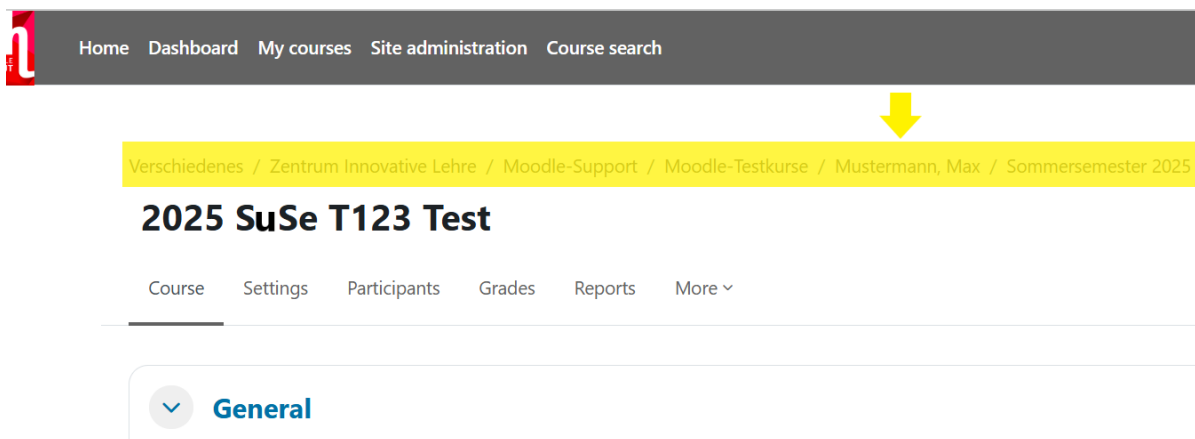

see instructions [Duplicate/copy course](#)

# Delete course

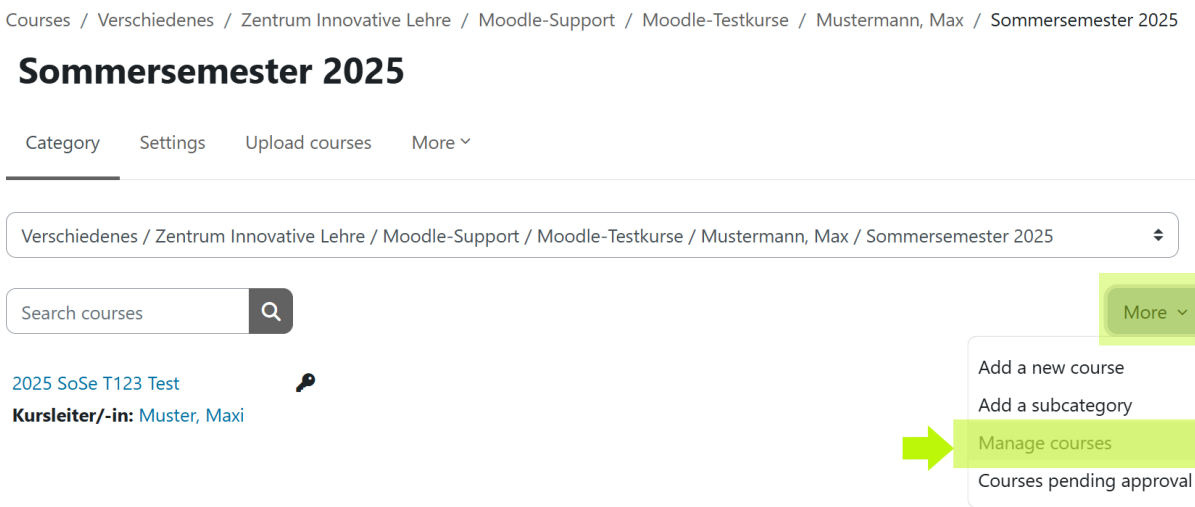

New as of WiSe 2025/26

1. Go to your course category. You can access your own course category most easily via the so-called breadcrumb in one of your courses.

2. To manage your courses in your own course category, select the option More and in the dropdown menu the option Manage courses.

3. You will then see a list of the courses in the sub-course categories on the right in editing mode.

4. Click on the Trash can icon for the course you want to delete

## Sommersemester 2025

Create new course Sort courses Per page: 50

<input type="checkbox"/>	2025 SoSe T123 Test					
<input type="checkbox"/>	Test course 2026					

5. Confirm the deletion with Delete.
6. At the end of the deletion overview, click Continue.

7. The course has been removed.

## Create course

New as of WiSe 2025/26

Note: If the courses for the new semester have not yet been created automatically for you, you can create the courses you need independently without Moodle support.

1. Select the main page „My courses“
2. Select the option Create course

3. Fill out the form under „Add a new course“ and confirm your entries with Save and display.

4. The new course is displayed.

5. **Important: You are not**

**automatically enrolled as course instructor.**

6. Select the tab Participants and Enrol users 7. Search for your own name under Select users and choose Course instructor (Kursleiter/-in) under Assign role.

**Enrol users** ×

**Enrolment options**

Select users ✕ **Mustermann, Maria**

10. Follow the steps of the instructions see [Self-enrollment\\_Change enrollment key](#)

## Back up course (.mbz file)

1. Open the desired course.
2. Click on More on the right and select the last option Course reuse.

3. Select Backup.

# Course reuse

Import

**Backup**

Restore

Reset

5. You will be guided through the backup menu. In the Backup settings, define which content should be backed up. If you do not want to make any changes, click Jump to final step (useful for archiving purposes) or select Next to review and confirm the backup.

6. Finally, start the backup with Perform backup.

7. 4. Perform backup The backup process is carried out and displayed using a progress bar.

8. After the backup process has been successfully completed, click Continue.

9. Download the created MBZ file located in the area User private backup area and then save the file on your university drive or similar.
